

Why remote reading?

READY Suite

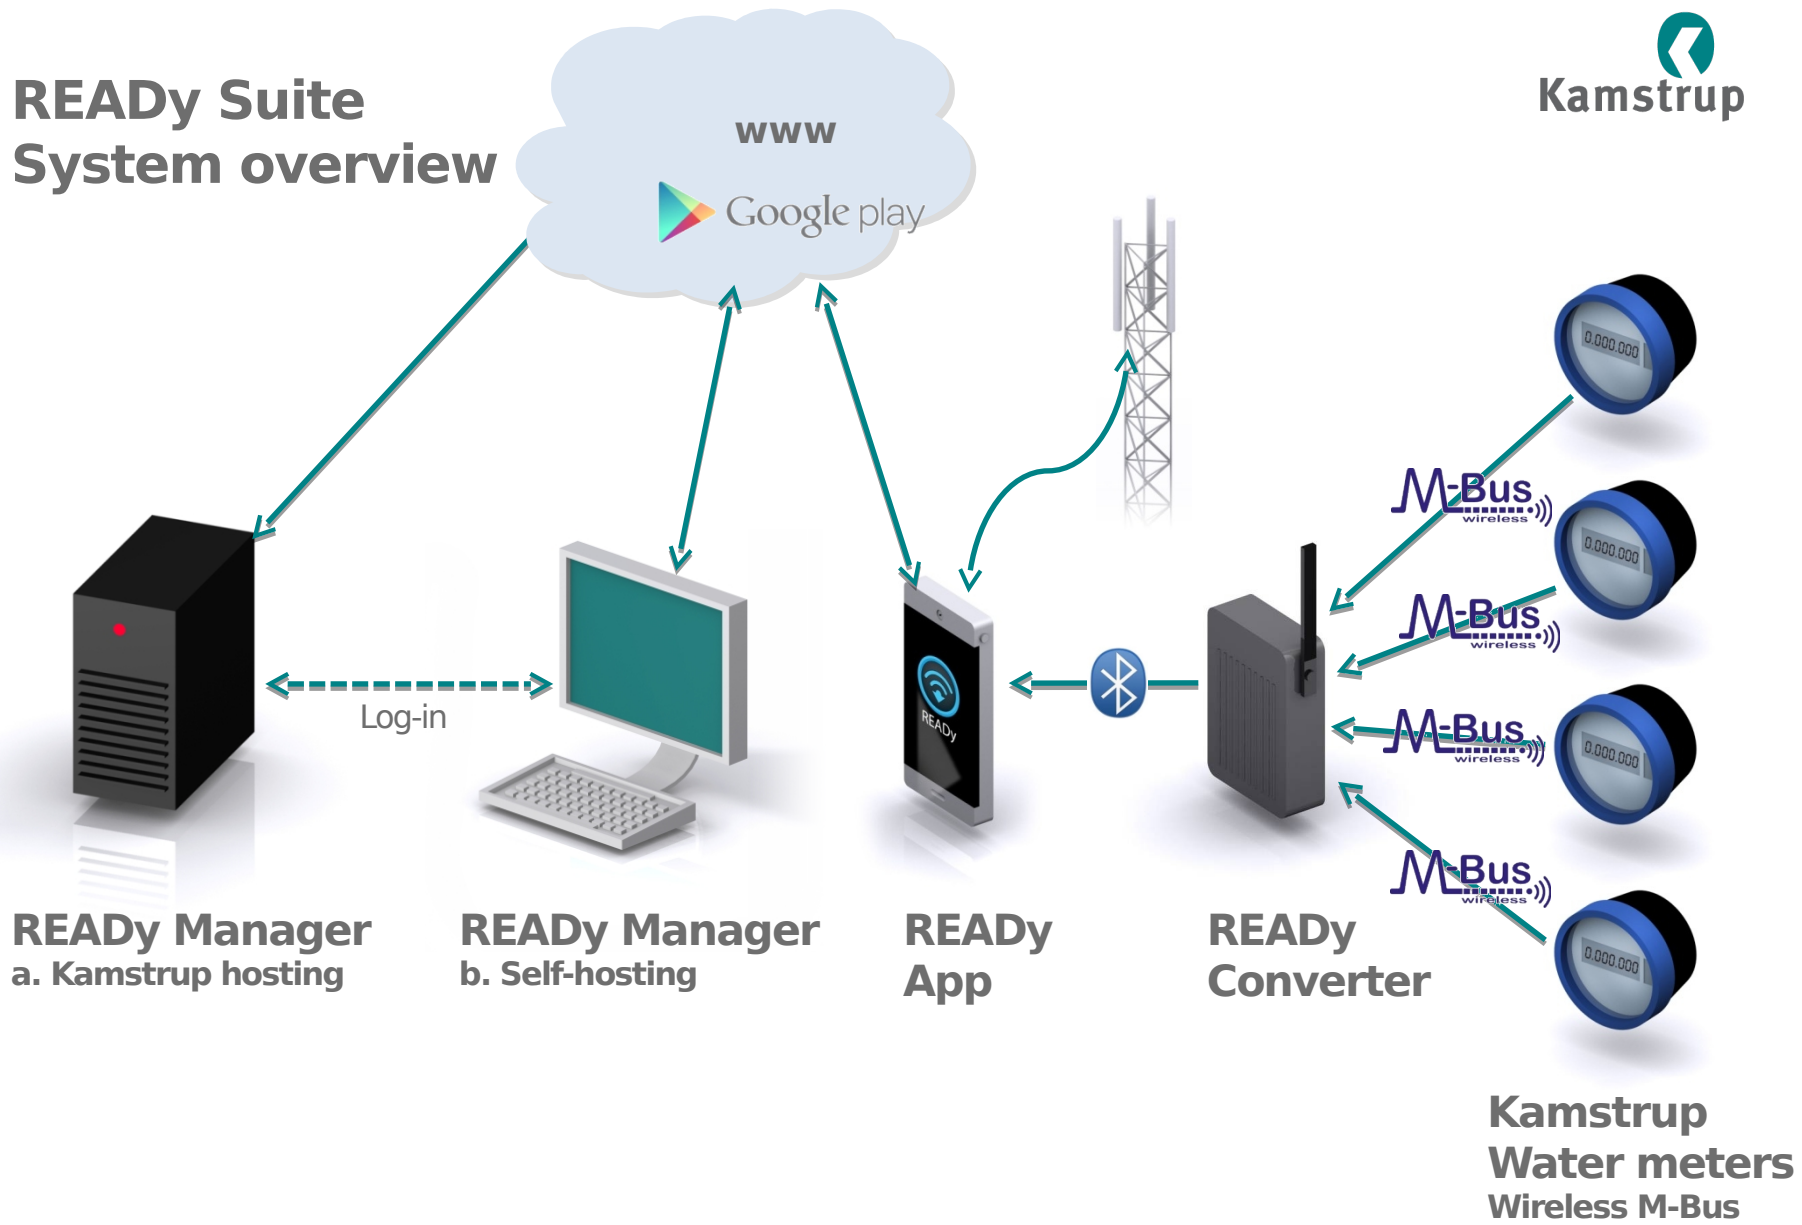

READy Suite

Remote reading - secure, flexible, easy and efficient...

READY Suite System overview

READy Suite

- secure because...

Supports all data formats

Works with existing programs

No risk of typing errors

Reliable billing

Electronic “security lock” on all meters

Unique data reading, no unauthorized third-party reading

Based on known technologies

Less risk of disturbances during operation

ALL meters are read

ALL customers are billed

READY Suite

- flexible because...

Use existing Android smartphones

No investments in new "readers"

Reading and smartphone in one function

Multiple use on the same platform

Used on all Kamstrup intelligent Wireless M-Bus water meters

No additional investments in hardware

Possibility for defining groups

User-defined reading

Possibility for hosting at Kamstrup

No investments in new IT hardware and software

READY Suite

- easy because...

Up to 15,000 meters per READY Suite

Large capacity

Receives data from all Wireless M-Bus meters

Independent of predefined routes

Clear visual indication of read meters

Good and precise overview for navigation

Result in list view

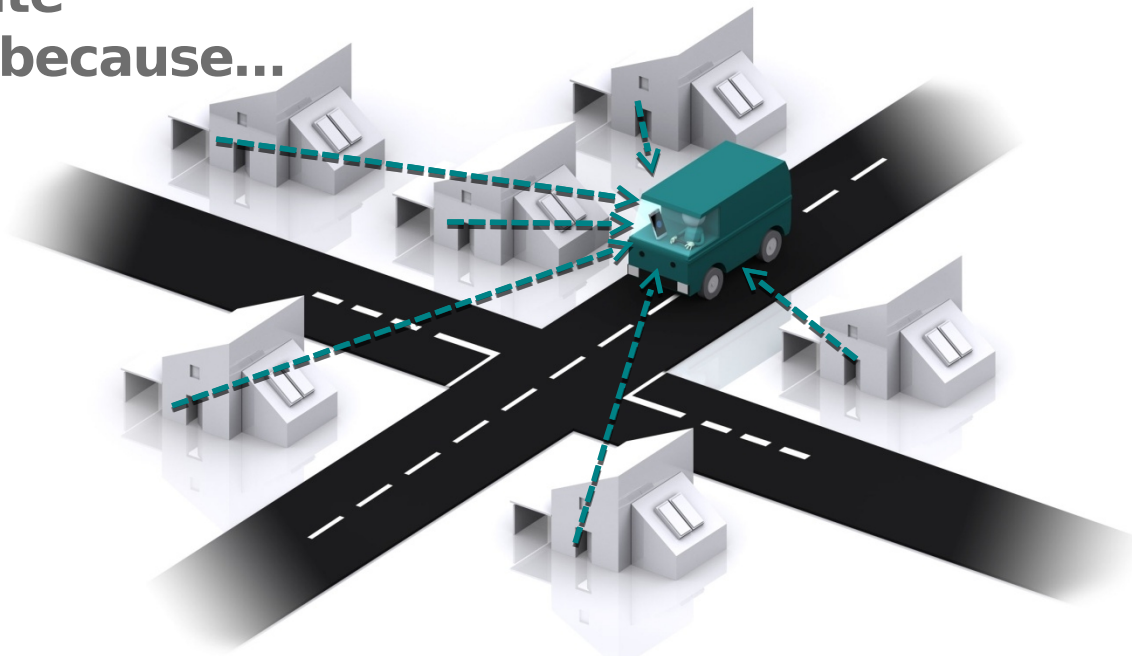

Well-documented overview

Few start-up resources

Minimal investment - large gain

READY Suite

- efficient because...

Mobile reading from moving vehicle

Efficient reading platform

Less time-consuming reading

Optimal use of ressources

Real-time reading with PC

Transfer of data is quick and efficient

Online registration

Uncomplicated to get started

Google Maps is a known platform

No need to learn a new map platform
